
GenCyS 2025 – Organizing Team

Powered by People Who Live and Breathe Cybersecurity

GenCyS 2025 is organized by a cross-functional team of passionate professionals from UST, supported by academic advisors, cybersecurity mentors, operations leads, and volunteer coordinators. This dedicated group ensures the event delivers technical depth, smooth execution, and a rewarding experience for thousands of participants across India.

Core Organizing Committee

Event Strategy & Vision

Led by UST's cybersecurity leadership, this team defines the event's theme, focus areas, and execution roadmap.

Marketing & Outreach

Responsible for promotions, social campaigns, partnerships, and university engagement.

Technical Curation

Builds and vets CTF challenges, reviews workshop proposals, and ensures security and fairness across competitions.

Academic & Paper Review Panel

Faculty members and senior researchers evaluating Call for Paper submissions across industry and academic tracks.

Speaker Relations & Programming

Liaises with keynote guests, coordinates speaker logistics, and supports session moderation.

CTF Challenge Engineers

A specialized group of **red teamers, bug bounty hunters, and DevSecOps practitioners** who have:

- Designed and tested 50+ unique challenges
 - Built a scalable and secure CTF platform
 - Developed real-world simulations across categories like reverse engineering, cryptography, web, and forensics
-

Mentors & Advisors

Industry experts and educators provide mentorship to selected student participants before and after the event.

Mentorship includes:

- Resume reviews and career guidance
 - Portfolio building support
 - Post-event skill development resources
-

Volunteers

UST employees, student ambassadors, and cybersecurity community members contribute by:

- Managing session rooms and chat support
- Assisting speakers and workshop leaders
- Helping onboard new participants

Without this tireless team, GenCyS 2025 would not be possible.

Thank You

We extend our deepest gratitude to every contributor working behind the scenes to make GenCyS a world-class virtual cybersecurity experience.
