
GenCyS 2025 – Hands-on Workshops

Learn by Doing: Practical Security Labs for Every Skill Level

The GenCyS 2025 workshops are designed to deliver **interactive, hands-on learning experiences** across a wide range of cybersecurity disciplines. Led by UST experts and industry practitioners, these sessions cater to learners from beginner to advanced levels and focus on emerging technologies, real-world vulnerabilities, and modern defense strategies.

Workshop Tracks

Workshop Title	Level	Description
Hacking AI Models	Intermediate	Discover how attackers manipulate machine learning systems. Learn about adversarial input crafting, model poisoning, and techniques to defend against AI misuse.
Secure Your Cloud	Beginner	A guided session on securing cloud environments (AWS, Azure, GCP). Covers configuration hardening, IAM best practices, logging, and compliance basics.
Bug Bounty Simulation	Advanced	Step into the shoes of a bug bounty hunter. Explore real web app vulnerabilities, misconfigurations, and exploit paths using ethical tools and live environments.

What You'll Learn

- Threat simulation and red team tactics
 - Vulnerability scanning and report generation
 - Identity and access management in cloud infrastructure
 - Exploitation tools and automation techniques
 - How to think like an attacker — and respond like a defender
-

Who Should Attend?

- Students looking to build practical skills
 - Security professionals seeking hands-on refreshers
 - DevSecOps engineers and application security testers
 - Cloud administrators and SREs
 - Anyone preparing for a CTF or career in cybersecurity
-

Led By Experts From:

- UST Cyber Threat Response Team
- Guest instructors from McAfee, Snyk, and academia
- Ethical hackers and bug bounty veterans

Each workshop is delivered with **lab access**, **supporting material**, and **optional assessments** for those seeking certification.

Registration & Access

- All workshops are **free** but require prior registration
 - Spaces are limited — accepted on a first-come, first-served basis
 - Registered attendees will receive lab access details via email
 - Delivered live during GenCyS 2025 (Aug 23–24)
 - Recordings available post-event for registered participants
-
