
GenCyS 2025 – Featured Speakers

Meet the Visionaries Securing Our Digital Future

GenCyS 2025 proudly brings together a diverse lineup of **cybersecurity experts, researchers, architects, and innovators** to share insight on next-gen threats, ethical hacking, AI security, and enterprise defense strategies.

These speakers are leaders in their fields—driving security evolution in some of the world’s most trusted companies.

Keynote & Expert Speakers

Faizal Ashruf

Cyber Security Specialist, UST

A passionate evangelist for accessible security education. Faizal helps enterprises build practical security maturity models.

Abbas Kudrati

Chief Identity Security Advisor, Silverfort

Global advisor and strategist, focused on digital identity, zero trust, and IAM integration across hybrid environments.

Dr. Neenu Kuriakose

Assistant Professor, Rajagiri College

A researcher in privacy-preserving AI, Neenu blends academic insights with real-world application.

Georgie Kurien

Infosec & Data Privacy Lead, SecnSure

Specialist in data protection regulation, cybersecurity audits, and organizational security posture transformation.

Adnan Masood

Chief AI Architect, UST

Explores the boundaries of AI and ML in cybersecurity—from adversarial AI to generative model controls.

Chitra V. S. Nair

Cloud & AI Architect, McAfee

Designs and implements secure, scalable cloud ecosystems for enterprise clients worldwide.

Vishnu Pradeep

Security Risk & Compliance Lead, Amazon

Focuses on strategic risk mitigation, compliance engineering, and GRC alignment at cloud-scale.

Sunil Varkey

Cybersecurity Evangelist

With 25+ years in cyber defense, Sunil mentors future leaders and advises Fortune 500 companies.

Tony Velleca

CEO, CyberProof

Visionary in managed detection and response (MDR), specializing in threat intelligence and SOC transformation.

Vandana Verma

Security Relations Leader, Snyk

OWASP contributor and global speaker on secure development practices, AppSec, and community outreach.

Panel Topics & Themes

- AI-Driven Threat Intelligence
 - Zero Trust in the Modern Enterprise
 - Navigating Cyber Risk in Cloud Environments
 - Red Team vs Blue Team: Lessons from the Trenches
 - Identity Security in a Remote-First World
-

Session Format

- **Keynote presentations** (live, with audience Q&A)
- **Expert panels** with moderated discussions
- **Fireside chats** featuring leadership insight
- **Recorded talks** available post-event

All sessions will be available to **registered attendees** through the event portal with interaction tools and live support.
