
GenCyS 2025 – Call for Papers

Bridging Academia and Industry Through Innovation

GenCyS 2025 invites **academicians, researchers, practitioners, and students** to submit original contributions to the field of cybersecurity, AI, and digital defense. This is an opportunity to showcase your work on a national platform and contribute to meaningful security discussions at scale.

Whether you're building solutions in threat detection, developing privacy frameworks, or analyzing zero-day vulnerabilities — this is your platform to share it.

Focus Areas

Submissions may include (but are not limited to):

- AI and Machine Learning in Cybersecurity
 - Threat Intelligence and Predictive Defense
 - Cloud Security & Identity Access Management
 - Post-Quantum Cryptography & Encryption Standards
 - Secure DevOps and Supply Chain Security
 - Governance, Risk, and Compliance (GRC)
 - Cyber Threat Modeling & Simulation
 - Blockchain Security and Decentralized Systems
 - Security in IoT and Embedded Devices
 - Privacy Engineering and Regulatory Impact (e.g., GDPR, PDPB)
-

Submission Guidelines

- **Abstract length:** Max 300 words
- **Paper format:** PDF, IEEE style preferred (4–8 pages)
- **Submission deadline:** July 31, 2025
- **Notification of acceptance:** August 10, 2025
- **Presentation format:** Live virtual talk (10–15 minutes) or pre-recorded video
- **Language:** English only

All submissions will undergo a **peer-review process** by a panel of UST experts and academic reviewers.

Recognition

- Selected authors will present during GenCyS 2025
 - Top papers may be published in UST's cybersecurity journal or event proceedings
 - Certificates of merit for accepted contributors
 - Exceptional work may be invited for post-event interviews and mentoring
-

Who Should Submit?

- University professors and researchers in cyber-related domains
 - Postgraduate and doctoral candidates
 - Security engineers and architects
 - Industry professionals working on innovative solutions
 - Cybersecurity startup founders or technical leads
-
